The **2024 ICD-10-CM Expert for Home Health and Hospice**, with **early delivery**, uses our hallmark features and format, making the challenge of accurate diagnosis coding easier. Use the codebook that contains the complete ICD-10-CM code set and the familiar Optum coding and reimbursement alerts for home health and hospice, including color bars and symbols that identify diagnosis codes for case mix, non-routine supplies, and non-cancer hospice diagnoses. Coding tips and definitions of commonly treated conditions specific to home health and hospice are also included.

Guaranteed delivery before October 1, 2023. The timing of the CMS release of the Official Guidelines for Coding and Reporting might not allow for early delivery. Therefore, this early delivery version **might** contain the 2023 guidelines. A booklet containing the Official Guidelines for Coding and Reporting for 2024 will be shipped separately if the 2024 guidelines are not available at the time this edition goes to press.
