National Average Payment Table Update

The national average payment for each DRG is calculated by multiplying the current relative weight of the DRG by the national average hospital Medicare base rate. The national average hospital Medicare base rate is an average of the sum of four categories: Hospital Submitted Quality Data and is a Meaningful EHR User, Hospital Did NOT Submit Quality Data and is a Meaningful EHR User, Hospital Submitted Quality Data and is NOT a Meaningful EHR User, Hospital Did NOT Submit Quality Data and is NOT a Meaningful EHR User, using dollar amounts from new data published in the Federal Register FY 2025 Final Rule, Table 1A. National Adjusted Operating Standardized Amounts; Labor/Nonlabor (if wage index greater than 1) or Table 1B. National Adjusted Operating Standardized Amounts; Labor/Nonlabor (if wage index less than or equal to 1). This information is provided as a benchmark reference only. There is no official publication of the average hospital base rate; therefore, the national average payments provided in this table are approximate.

Calculated with an average hospital Medicare base rate of \$6497.36. Each hospital's base rate and corresponding payment will vary. The national average hospital Medicare base rate is an average of the sum of four categories: Hospital Submitted Quality Data and is a Meaningful EHR User, Hospital Did NOT Submit Quality Data and is a Meaningful EHR User, Hospital Submitted Quality Data and is NOT a Meaningful EHR User, Hospital Did NOT Submit Quality Data and is NOT a Meaningful EHR User, using dollar amounts published in the Federal Register FY 2024 Final Rule, Table 1A. National Adjusted Operating Standardized Amounts; Labor/Nonlabor (if wage index greater than 1) or Table 1B. National Adjusted Operating Standardized Amounts; Labor/Nonlabor (if wage index less than or equal to 1). MS-DRGs 998 and 999 contain cases that could not be assigned to valid DRGs.

Note: If there is no value in either the geometric mean length of stay or the arithmetic mean length of stay columns, the volume of cases is insufficient to determine a meaningful computation of these statistics.
