Introduction

Note: All data current as of November 15, 2024.

HCPCS Level II codes, except for the dental code series, are developed and maintained by a joint editorial panel consisting of the Centers for Medicare and Medicaid Services (CMS), the Blue Cross Blue Shield Association, and the Health Insurance Association of America. HCPCS Level II codes may be used throughout the United States in all Medicare regions. They consist of one alpha character (A through V) followed by four digits. Optum does not change the code descriptions other than correcting typographical errors. There are some codes that appear to be duplicates. CMS has indicated that each of the codes is used to report a specific condition or service. At press time, CMS had not provided further clarification regarding these codes. Additional information may be found on the CMS website, <https://www.cms.gov/medicare/coding-billing/healthcare-common-procedure-system>.

Any supplier or manufacturer can submit a request for coding modification to the HCPCS Level II National codes. A document explaining the HCPCS modification process, as well as a detailed format for submitting a recommendation for a modification to HCPCS Level II codes, is available on the HCPCS website at <https://www.cms.gov/medicare/coding-billing/healthcare-common-procedure-system>. Besides the information requested in this format, a requestor should also submit any additional descriptive material, including the manufacturer's product literature and information that is believed would be helpful in furthering CMS's understanding of the medical features of the item for which a coding modification is being recommended. The HCPCS coding review process is an ongoing, continuous process.

The dental (D) codes are not included in the official 2025 HCPCS Level II code set. The American Dental Association (ADA) holds the copyright on those codes and instructed CMS to remove them. As a result, Optum has removed them from this product; however, Optum has additional resources available for customers requiring the dental codes. Please visit www.optumcoding.com or call 1.800.464.3649.

Significant updates to this manual will be provided on our product updates page at [Optumcoding.com](https://www.optumcoding.com), which can be accessed at the following: <https://www.optumcoding.com/ProductUpdates/>. Password: LEVEL25

Note: The expanded Medically Unlikely Edit (MUE) tables containing HCPCS/CPT codes, MUE values, MUE adjudication indicators, and MUE rationale are no longer published in this book. The tables are updated quarterly and can be found on the CMS website at <https://www.cms.gov/medicare/coding-billing/national-correct-coding-initiative-nci-edits/medicare-nci-medically-unlikely-edits>.

Getting Started with HCPCS Level II Expert

Coders should keep in mind that the insurance companies and government do not base payment solely on what was done for the patient. They need to know why the services were performed. In addition to using the HCPCS coding system for procedures and supplies, coders must also use the ICD-10-CM coding system to denote the diagnosis. This book will not discuss ICD-10-CM codes, which can be found in a current ICD-10-CM code book for diagnosis codes. To locate a HCPCS Level II code, follow these steps:

1. Identify the services or procedures that the patient received.

Example:

Patient administered PSA exam.

2. Look up the appropriate term in the index.

Example:

Screening

prostate specific antigen test (PSA)

Coding Tip: Coders who are unable to find the procedure or service in the index can look in the table of contents for the type of procedure or device to narrow the code choices. Also, coders should remember to check the unlisted procedure guidelines for additional choices.

3. Assign a tentative code.

Example:

Code G0103

Coding Tip: To the right of the terminology, there may be a single code or multiple codes, a cross-reference, or an indication that the code has been deleted. Tentatively assign all codes listed.

4. Locate the code or codes in the appropriate section. When multiple codes are listed in the index, be sure to read the narrative of all codes listed to find the appropriate code based on the service performed.

Example:

G0103 Prostate cancer screening; prostate specific antigen test (PSA)

5. Check for color bars, symbols, notes, and references.

G0103 Prostate cancer screening; prostate specific antigen test (PSA) A

6. Review the appendixes for the reference definitions and other guidelines for coverage issues that apply.
7. Determine whether any modifiers should be appended.
8. Assign the code.

Example:

The code assigned is G0103.

Coding Standards

Levels of Use

Coders may find that the same procedure is coded at two or even three levels. Which code is correct? There are certain rules to follow if this should occur.

When both a CPT and a HCPCS Level II code have virtually identical narratives for a procedure or service, the CPT code should be used. If, however, the narratives are not identical (e.g., the CPT code narrative is generic, whereas the HCPCS Level II code is specific), the Level II code should be used.

Be sure to check for a national code when a CPT code description contains an instruction to include additional information, such as describing a specific medication or supply. There are many HCPCS Level II codes that specify supplies in more detail.

Special Reports

Submit a special report with the claim when a new, unusual, or variable procedure is provided or a modifier is used. Include the following information:

- A copy of the appropriate report (e.g., operative, x-ray), explaining the nature, extent, and need for the procedure
- Documentation of the medical necessity of the procedure
- Documentation of the time and effort necessary to perform the procedure

Organization of Optum HCPCS Level II Expert

The Optum 2025 HCPCS Level II contains mandated changes and new codes for use as of January 1, 2025. Deleted codes have also been indicated and cross-referenced to active codes when possible. New codes have been added to the appropriate sections, eliminating the time-consuming step of looking in two places for a code. However, keep in mind that the information in this book is a reproduction of the 2025 HCPCS; additional information on coverage issues may have been provided to Medicare contractors after publication. All contractors periodically update their systems and records throughout the year. If this book does not agree with your contractor, it is either because of a mid-year update or correction, or a specific local or regional coverage policy.

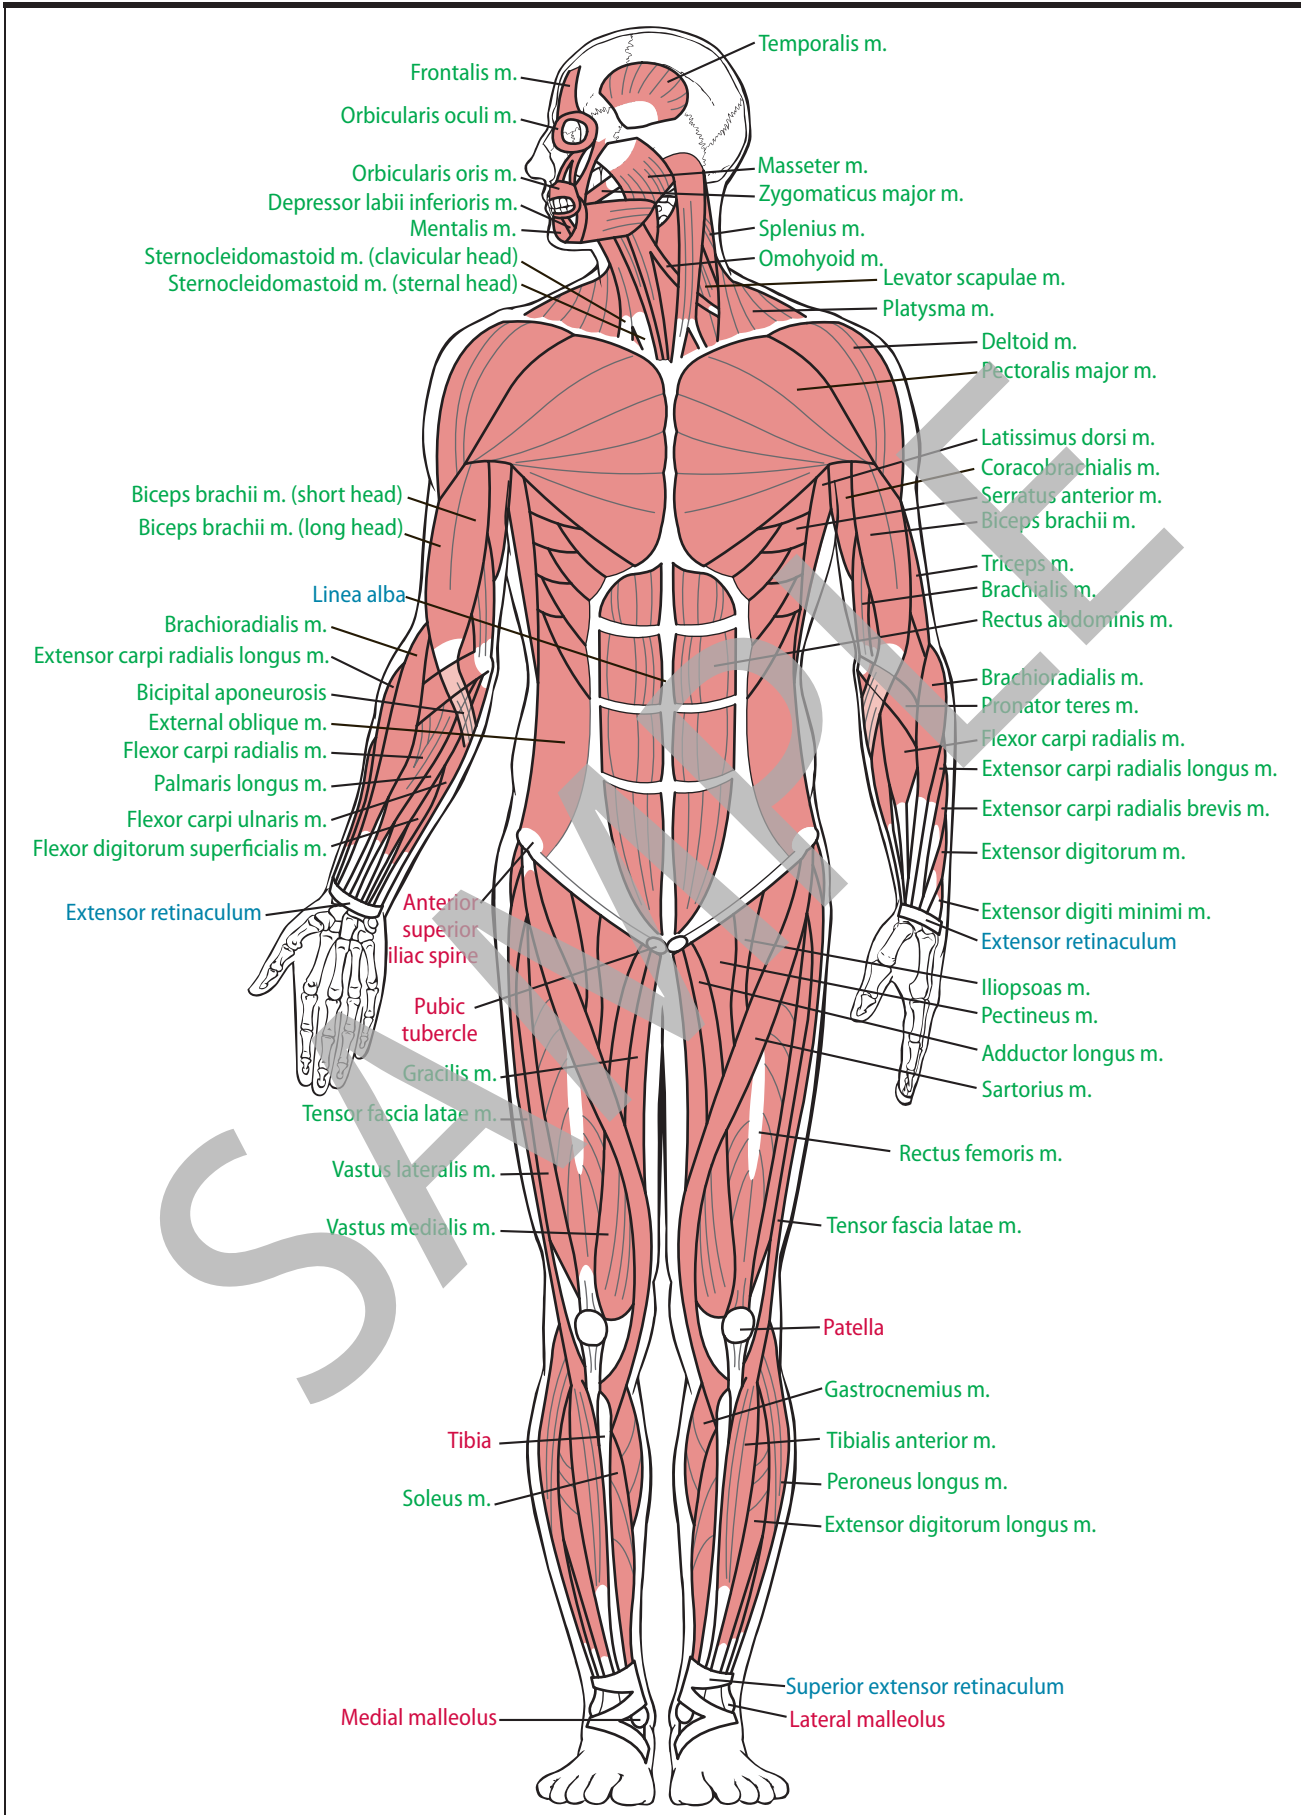

HCPCS Code Index

Because HCPCS is organized by code number rather than by service or supply name, the index enables the coder to locate any code without looking through individual ranges of codes. Just look up the medical or surgical supply, service, orthotic, or prosthetic in question to find the appropriate codes. This index also refers to many of the brand names by which these items are known.

Brand Name Drugs

Brand name drugs commonly reported with a code are listed underneath the code descriptor in blue font. This note will not appear if the brand name is part of the code descriptor.

 yttrium 90, C2616

Spacer
 interphalangeal joint, L8658

Specialist Ankle Foot Orthotic, L1930

Specialist Closed-Back Cast Boot, L3260

Specialist Gaitkeeper Boot, L3260

Specialist Health/Post Operative Shoe, A9270

Specialist Heel Cups, L3485

Specialist Insoles, L3510

Specialist J-Splint Plaster Roll Immobilizer, A4580

Specialist Open-Back Cast Boot, L3260

Specialist Plaster Bandages, A4580

Specialist Plaster Roll Immobilizer, A4580

Specialist Plaster Splints, A4580

Specialist Pre-Formed Humeral Fracture Brace, L3980-L3981

Specialist Pre-Formed Ulnar Fracture Brace, L3982

Specialist Tibial Pre-formed Fracture Brace, L2116

Specialist Toe Insert for Specialist Closed-Back Cast Boot and Specialist Health/Post Operative Shoe, A9270

Specialized mobility technology
 resource-intensive services, G0501

Specialty absorbent dressing, A6251-A6256

Specialty care
 coordination
 psychosis, H2040-H2041

Specimen, G9291, G9295

Spectacles, S0504-S0510, S0516-S0518
 dispensing, S0595

Speech and language pathologist
 home health setting, G0153

Speech assessment, V5362-V5364

Speech generating device, E2500-E2599

Speech therapy, S9128, S9152

Speech volume modulation system, E3000

Spenco shoe insert, foot orthotic, L3001

Sperm
 aspiration, S4028
 donor service, S4025
 sperm procurement, S4026, S4030-S4031

Sphygmomanometer/blood pressure, A4660

Spinal orthotic
 Boston type, L1200
 cervical, L0112, L0180-L0200
 cervical-thoracic-lumbar-sacral orthotic (CTLSO), L0700, L0710, L1000
 halo, L0810-L0830
 Milwaukee, L1000
 multiple post collar, L0180-L0200
 scoliosis, L1000, L1200, L1300-L1499
 thoracic, pectus carinatum, L1320

Spinal orthotic — *continued*

torso supports, L0970-L0999

Spirometer
 electronic, E0487
 nonelectronic, A9284

Splint
 ankle, E1815, E1822-E1823, L4392-L4398, S8451
 digit, prefabricated, S8450
 dynamic, E1800, E1805, E1810, E1815
 elbow, E1800, E1803-E1804, S8452
 finger, E1825-E1827, Q4049
 footdrop, L4398
 hallus valgus, L3100
 long arm, Q4017-Q4020
 long leg, L4370, Q4041-Q4044
 pneumatic, L4350, L4360, L4370
 short arm, Q4021-Q4024
 short leg, Q4045-Q4048
 Specialist Plaster Splints, A4580
 supplies, Q4051
 Thumb-O-Prene Splint, L3999
 toad finger, A4570
 toe, E1828-E1830
 wrist, E1805, E1807-E1808, S8451

Spoke protectors, each, K0065

Sports supports hinged knee support, L1832

Standing frame system, E0638, E0641-E0642

Star Lumen tubing, A4616

Stat
 laboratory request, S3600-S3601

Sten, foot prosthesis, L5972

Stent
 coated
 with delivery system, C1874
 without delivery system, C1875
 with delivery system, C1876
 without delivery system, C1877
 noncoronary
 temporary, C2617, C2625
 with delivery system, S1091

Stent placement
 intracoronary, C9600-C9601
 with percutaneous transluminal coronary atherectomy, C9602-C9603

Stereotactic body radiation therapy, G0563

Stereotactic guidance
 breast biopsies, C7501

Stereotactic radiosurgery
 therapy, G0339, G0340

Sterile water, A4216-A4218

Stimulated intrauterine insemination, S4035

Stimulation/Stimulators
 ambulation of spinal cord injured, E0762
 auricular acupuncture, S8930
 cancer treatment, A4555, E0766
 cough stimulating device, E0482
 cranial electrotherapy (CES), A4596
 disposable, replacement only, A4560
 electric shock unit, E0745
 external upper limb tremor
 wrist, K1018-K1019
 functional transcatheter, E0764, E0770
 interferential current, S8130-S8131
 joint, E0762
 osteogenesis, E0747-E0749
 noninvasive, E0747-E0748, E0755
 surgically implanted, E0749
 other than wound care, G0283
 pelvic floor, E0740
 salivary reflex, E0755
 scoliosis, E0744
 spinal cord injured, E0764
 supplies, A4595, K1017, K1019
 cranial electrotherapy (CES), A4596
 tongue muscle, E0490-E0493
 transcutaneous, E0770
 spinal cord injured, E0764
 trigeminal nerve, A4541, E0733
 ulcer, G0281, G0329
 upper limb, A4540, A4542, E0734
 vagus nerve, E0735
 vagus nerve, noninvasive, K1020
 wound, nonulcer, G0282, G0295

- A4726** Dialysate solution, any concentration of dextrose, fluid volume greater than 5999 cc, for peritoneal dialysis N ✓ ⊕
- A4728** Dialysate solution, nondextrose containing, 500 ml B ✓ ⊕
- A4730** Fistula cannulation set for hemodialysis, each N ✓ ⊕
- A4736** Topical anesthetic, for dialysis, per g N ✓ ⊕
- A4737** Injectable anesthetic, for dialysis, per 10 ml N ✓ ⊕
- A4740** Shunt accessory, for hemodialysis, any type, each N ⊕
- A4750** Blood tubing, arterial or venous, for hemodialysis, each N ✓ ⊕
- A4755** Blood tubing, arterial and venous combined, for hemodialysis, each N ✓ ⊕
- A4760** Dialysate solution test kit, for peritoneal dialysis, any type, each N ✓ ⊕
- A4765** Dialysate concentrate, powder, additive for peritoneal dialysis, per packet N ✓ ⊕
- A4766** Dialysate concentrate, solution, additive for peritoneal dialysis, per 10 ml N ✓ ⊕
- A4770** Blood collection tube, vacuum, for dialysis, per 50 N ✓ ⊕
- A4771** Serum clotting time tube, for dialysis, per 50 N ✓ ⊕
- A4772** Blood glucose test strips, for dialysis, per 50 N ✓ ⊕
- A4773** Occult blood test strips, for dialysis, per 50 N ✓ ⊕
- A4774** Ammonia test strips, for dialysis, per 50 N ✓ ⊕
- A4802** Protamine sulfate, for hemodialysis, per 50 mg N ✓ ⊕
- A4860** Disposable catheter tips for peritoneal dialysis, per 10 N ✓ ⊕
- A4870** Plumbing and/or electrical work for home hemodialysis equipment N ⊕
- A4890** Contracts, repair and maintenance, for hemodialysis equipment N ⊕
- A4911** Drain bag/bottle, for dialysis, each N ✓ ⊕
- A4913** Miscellaneous dialysis supplies, not otherwise specified N ⊕
Pertinent documentation to evaluate medical appropriateness should be included when this code is reported. Determine if an alternative HCPCS Level II or a CPT code better describes the service being reported. This code should be used only if a more specific code is unavailable.
CMS: 100-04,8,20; 100-04,8,60.2.1
- A4918** Venous pressure clamp, for hemodialysis, each N ✓ ⊕
- A4927** Gloves, nonsterile, per 100 N ✓ ⊕
- A4928** Surgical mask, per 20 N ✓ ⊕
- A4929** Tourniquet for dialysis, each N ✓ ⊕
- A4930** Gloves, sterile, per pair N ✓ ⊕
- A4931** Oral thermometer, reusable, any type, each N ✓ ⊕
- A4932** Rectal thermometer, reusable, any type, each N ✓

Ostomy Pouches and Supplies

- A5051** Ostomy pouch, closed; with barrier attached (one piece), each N ✓ ⊕
- A5052** Ostomy pouch, closed; without barrier attached (one piece), each N ✓ ⊕
- A5053** Ostomy pouch, closed; for use on faceplate, each N ✓ ⊕
- A5054** Ostomy pouch, closed; for use on barrier with flange (two piece), each N ✓ ⊕
- A5055** Stoma cap N ⊕

- A5056** Ostomy pouch, drainable, with extended wear barrier attached, with filter, (one piece), each N ✓ ⊕
- A5057** Ostomy pouch, drainable, with extended wear barrier attached, with built in convexity, with filter, (one piece), each N ✓ ⊕
- A5061** Ostomy pouch, drainable; with barrier attached, (one piece), each N ✓ ⊕
- A5062** Ostomy pouch, drainable; without barrier attached (one piece), each N ✓ ⊕
- A5063** Ostomy pouch, drainable; for use on barrier with flange (two-piece system), each N ✓ ⊕
- A5071** Ostomy pouch, urinary; with barrier attached (one piece), each N ✓ ⊕
- A5072** Ostomy pouch, urinary; without barrier attached (one piece), each N ✓ ⊕
- A5073** Ostomy pouch, urinary; for use on barrier with flange (two piece), each N ✓ ⊕
- A5081** Stoma plug or seal, any type N ⊕
- A5082** Continent device; catheter for continent stoma N ⊕
- A5083** Continent device, stoma absorptive cover for continent stoma N ⊕
- A5093** Ostomy accessory; convex insert N ⊕

Incontinence Supplies

- A5102** Bedside drainage bottle with or without tubing, rigid or expandable, each N ✓ ⊕
- A5105** Urinary suspensory with leg bag, with or without tube, each N ✓ ⊕
- A5112** Urinary drainage bag, leg or abdomen, latex, with or without tube, with straps, each N ✓ ⊕
- A5113** Leg strap; latex, replacement only, per set E ✓ ⊕
- A5114** Leg strap; foam or fabric, replacement only, per set E ✓ ⊕
- A5120** Skin barrier, wipes or swabs, each N ✓ ⊕ (AU, AV)
- A5121** Skin barrier; solid, 6 x 6 or equivalent, each N ✓ ⊕
- A5122** Skin barrier; solid, 8 x 8 or equivalent, each N ✓ ⊕
- A5126** Adhesive or nonadhesive; disk or foam pad N ⊕
- A5131** Appliance cleaner, incontinence and ostomy appliances, per 16 oz N ✓ ⊕
- A5200** Percutaneous catheter/tube anchoring device, adhesive skin attachment N ⊕

Diabetic Shoes, Fitting, and Modifications

According to Medicare, documentation from the prescribing physician must certify the diabetic patient has one of the following conditions: peripheral neuropathy with evidence of callus formation; history of preulcerative calluses; history of ulceration; foot deformity; previous amputation; or poor circulation. The footwear must be fitted and furnished by a podiatrist, pedorthist, orthotist, or prosthetist.

- A5500** For diabetics only, fitting (including follow-up), custom preparation and supply of off-the-shelf depth-inlay shoe manufactured to accommodate multidensity insert(s), per shoe V ✓ ⊕
CMS: 100-02,15,140
- A5501** For diabetics only, fitting (including follow-up), custom preparation and supply of shoe molded from cast(s) of patient's foot (custom molded shoe), per shoe V ✓ ⊕
CMS: 100-02,15,140

Durable Medical Equipment E0100-E8002

E codes include durable medical equipment such as canes, crutches, walkers, commodes, decubitus care, bath and toilet aids, hospital beds, oxygen and related respiratory equipment, monitoring equipment, pacemakers, patient lifts, safety equipment, restraints, traction equipment, fracture frames, wheelchairs, and artificial kidney machines.

Canes

- E0100** Cane, includes canes of all materials, adjustable or fixed, with tip ☑ ☒ (NU, RR, UE)
White canes for the blind are not covered under Medicare.
- E0105** Cane, quad or three-prong, includes canes of all materials, adjustable or fixed, with tips ☑ ☒ (NU, RR, UE)

Crutches

- E0110** Crutches, forearm, includes crutches of various materials, adjustable or fixed, pair, complete with tips and handgrips ☑ ☑ ☒ (NU, RR, UE)

- E0111** Crutch, forearm, includes crutches of various materials, adjustable or fixed, each, with tip and handgrips ☑ ☑ ☒ (NU, RR, UE)
- E0112** Crutches, underarm, wood, adjustable or fixed, pair, with pads, tips, and handgrips ☑ ☑ ☒ (NU, RR, UE)
- E0113** Crutch, underarm, wood, adjustable or fixed, each, with pad, tip, and handgrip ☑ ☑ ☒ (NU, RR, UE)
- E0114** Crutches, underarm, other than wood, adjustable or fixed, pair, with pads, tips, and handgrips ☑ ☑ ☒ (NU, RR, UE)
- E0116** Crutch, underarm, other than wood, adjustable or fixed, with pad, tip, handgrip, with or without shock absorber, each ☑ ☑ ☒ (NU, RR, UE)
- E0117** Crutch, underarm, articulating, spring assisted, each ☑ ☑ ☒ (RR)
- E0118** Crutch substitute, lower leg platform, with or without wheels, each ☑ ☑
Medicare covers walkers if patient's ambulation is impaired.

Walkers

- E0130** Walker, rigid (pickup), adjustable or fixed height ☑ ☒ (NU, RR, UE)
CMS: 100-04,36,50,15

- E0135** Walker, folding (pickup), adjustable or fixed height ☑ ☒ (NU, RR, UE)
Medicare covers walkers if patient's ambulation is impaired.
CMS: 100-04,36,50,15
- E0140** Walker, with trunk support, adjustable or fixed height, any type ☑ ☒ (RR)
CMS: 100-04,36,50,15
- E0141** Walker, rigid, wheeled, adjustable or fixed height ☑ ☒ (NU, RR, UE)
Medicare covers walkers if patient's ambulation is impaired.
CMS: 100-04,36,50,15
- E0143** Walker, folding, wheeled, adjustable or fixed height ☑ ☒ (NU, RR, UE)
Medicare covers walkers if patient's ambulation is impaired.
CMS: 100-04,36,50,15
- E0144** Walker, enclosed, four-sided framed, rigid or folding, wheeled with posterior seat ☑ ☒ (RR)
CMS: 100-04,36,50,15
- E0147** Walker, heavy-duty, multiple braking system, variable wheel resistance ☑ ☒ (NU, RR, UE)
Medicare covers safety roller walkers only in patients with severe neurological disorders or restricted use of one hand. In some cases, coverage will be extended to patients with a weight exceeding the limits of a standard wheeled walker.
CMS: 100-04,36,50,15
- E0148** Walker, heavy-duty, without wheels, rigid or folding, any type, each ☑ ☑ ☒ (NU, RR, UE)
CMS: 100-04,36,50,15
- E0149** Walker, heavy-duty, wheeled, rigid or folding, any type ☑ ☒ (RR)
CMS: 100-04,36,50,15
- E0152** Walker, battery powered, wheeled, folding, adjustable or fixed height ☑
AHA: 2Q,24

Attachments

- E0153** Platform attachment, forearm crutch, each ☑ ☑ ☒ (NU, RR, UE)
- E0154** Platform attachment, walker, each ☑ ☑ ☒ (NU, RR, UE)
CMS: 100-04,36,50,14; 100-04,36,50,15
- E0155** Wheel attachment, rigid pick-up walker, per pair ☑ ☑ ☒ (NU, RR, UE)
CMS: 100-04,36,50,15
- E0156** Seat attachment, walker ☑ ☒ (NU, RR, UE)
CMS: 100-04,36,50,14; 100-04,36,50,15
- E0157** Crutch attachment, walker, each ☑ ☑ ☒ (NU, RR, UE)
CMS: 100-04,36,50,14; 100-04,36,50,15
- E0158** Leg extensions for walker, per set of four ☑ ☑ ☒ (NU, RR, UE)
CMS: 100-04,36,50,14; 100-04,36,50,15
- E0159** Brake attachment for wheeled walker, replacement, each ☑ ☑ ☒ (NU, RR, UE)
CMS: 100-04,36,50,15

Commodes

- E0160** Sitz type bath or equipment, portable, used with or without commode ☑ ☒ (NU, RR, UE)
Medicare covers sitz baths if medical record indicates that the patient has an infection or injury of the perineal area and the sitz bath is prescribed by the physician.

Appendix 1 — Table of Drugs and Biologicals

INTRODUCTION AND DIRECTIONS

The HCPCS 2025 Table of Drugs and Biologicals is designed to quickly and easily direct the user to drug names and their corresponding codes. Both generic and brand or trade names are alphabetically listed in the “Drug Name” column of the table. The associated A, C, J, K, Q, or S code is given only for the generic name of the drug. While every effort is made to make the table comprehensive, it is not all-inclusive.

The “Unit Per” column lists the stated amount for the referenced generic drug as provided by CMS. “Up to” listings are inclusive of all quantities up to and including the listed amount. All other listings are for the amount of the drug as listed. The editors recognize that the availability of some drugs in the quantities listed is dependent on many variables beyond the control of the clinical ordering clerk. The availability in your area of regularly used drugs in the most cost-effective quantities should be relayed to your third-party payers.

The “Route of Administration” column addresses the most common methods of delivering the referenced generic drug as described in current pharmaceutical literature. The official definitions for Level II drug codes generally describe administration other than by oral method. Therefore, with a handful of exceptions, oral-delivered options for most drugs are omitted from the Route of Administration column.

Intravenous administration includes all methods, such as gravity infusion, injections, and timed pushes. When several routes of administration are listed, the first listing is simply the first, or most common, method as described in current reference literature. The “VAR” posting denotes various routes of administration and is used for drugs that are commonly administered into joints, cavities, tissues, or topical applications, in addition to other parenteral administrations. Listings posted with “OTH” alert the user to other administration methods, such as suppositories or catheter injections.

Please be reminded that the Table of Drugs and Biologicals, as well as all HCPCS Level II national definitions and listings, constitutes a post-treatment medical reference for billing purposes only. Although the editors have exercised all normal precautions to ensure the accuracy of the table and related material, the use of any of this information to select medical treatment is entirely inappropriate. Do not code directly from the table. Refer to the tabular section for complete information.

See Appendix 3 for abbreviations.

Drug Name	Units Per	Route	Code
10% LMD	500 ML	IV	J7100

HCPCS Modifiers

- A1** Dressing for one wound
A2 Dressing for two wounds
A3 Dressing for three wounds
A4 Dressing for four wounds
A5 Dressing for five wounds
A6 Dressing for six wounds
A7 Dressing for seven wounds
A8 Dressing for eight wounds
A9 Dressing for nine or more wounds
- Modifiers A1, A2, A3, A4, A5, A6, A7, A8, and A9 wound dressings:
- Modifiers A1–A9 indicate that a primary or secondary dressing on a surgical or debrided wound is being applied. Primary dressings are defined as therapeutic or protective coverings, and secondary dressings are materials applied for a therapeutic or protective function.
 - Documentation must indicate the number of wounds being dressed.
 - The modifier number reported must correspond to the number of wound dressings applied, not necessarily the number of wounds treated. For example, a patient with three previously debrided wounds may require a secondary dressing on only two wounds, which would be reported with modifier A2.
 - Gradient compression stockings are not considered wound dressing and would not be reported with modifiers A1–A9 although A6531 and A6532 are covered for open venous stasis ulcers.
- AA** Anesthesia services performed personally by anesthesiologist
- Modifier AA has no effect on payment.
- AB** Audiology service furnished personally by an audiologist without a physician/NPP order for nonacute hearing assessment unrelated to disequilibrium, or hearing aids, or examinations for the purpose of prescribing, fitting, or changing hearing aids; service may be performed once every 12 months, per beneficiary
- This modifier can be appended to certain audiology service codes to indicate that the service was provided without an order by a physician or nonphysician practitioner. Services without an order are allowed once every 12 months per patient for nonacute hearing conditions.
- AD** Medical supervision by a physician: more than four concurrent anesthesia procedures
- Modifier AD is appended to physician claims when a physician supervised four or more concurrent procedures.
 - Payment is made on a 3 base unit amount.
 - Base units are assigned by CMS or payers, and the lowest unit value is 3.
- Example:*
The anesthesiologist is supervising five CRNAs whose services overlapped. The anesthesiologist reports each of these services with modifier AD appended. Each of these services will be reimbursed at the base rate of 3 units regardless of the actual base units assigned.
- AE** Registered dietician
- Append modifier AE when reporting nutritional services to indicate that an appropriate provider performed the service.
- AF** Specialty physician
AG Primary physician
- Modifiers AF and AG physician designation:
- These modifiers are appended as a physician designation for outpatient services provided in a critical access hospital (CAH) in a designated physician scarcity area (PSA) or health professional shortage area (HPSA).
 - Primary care physicians are defined as general practice, family practice, internal medicine, and obstetrics/gynecology for modifier AG.
 - Specialty care physicians are defined as specialties other than dental, optometry, chiropractic, or podiatry for modifier AF.
- AH** Clinical psychologist
- Modifier AH may be appended for services provided by a clinical psychologist who has met the required level of education (PhD) and hours of practice.

- AI** Principal physician of record
- CMS policies regarding the use of consultation and inpatient services codes were revised in 2010. Under these guidelines the inpatient and office/outpatient consultation services as described by these codes in the CPT book are not covered services. For Medicare patients, inpatient services will be reported only with the initial and subsequent hospital care codes.
 - Medicare requires that the initial hospital care code be reported for each physician's first visit with a patient during a specific hospitalization.
 - As only one physician may be the admitting physician, CMS has added HCPCS Level II modifier AI Principal physician of record, to be appended to the initial hospital care code reported by the attending physician. All other physicians and consultants report just the initial hospital or nursing facility care code without appending a modifier.
 - Subsequent inpatient encounters by any physician are reported using appropriate CPT codes.
- AJ** Clinical social worker
- Modifier AJ may be appended for services provided by a clinical psychologist who has met the required level of education (MSW) and hours of practice.
- AK** Nonparticipating physician
- Modifier AK is appended by physicians who are not participating providers with Medicare and are not "opt-out" physicians.
 - Nonparticipating providers may see patients in their offices or when providing on-call coverage.
 - This is separate from modifier GJ Opt-out physician or practitioner emergency or urgent service.
- AM** Physician, team member service
- The physician member of a team is required to perform one out of every three visits made by a team member.
 - Modifier AM should be appended to indicate a team member visit was performed by the physician.
 - Team member visits are denied if only one person rendering services is billing for team services, as this is inappropriate billing practice.
 - Modifier AM has no effect on payment.
- AO** Alternate payment method declined by provider of service
AP Determination of refractive state was not performed in the course of diagnostic ophthalmological examination
- AQ** Physician providing a service in an unlisted health professional shortage area (HPSA)
- Physician services furnished in a health professional shortage area (HPSA) qualify for a quarterly incentive payment. Global surgery packages may also qualify for these payments. The following guidelines apply for the HPSA incentive payment:
 - If the entire global surgery package is furnished in an HPSA, the procedure code for the surgery should be reported with the applicable HPSA procedure code modifier.
 - If only a portion of the global surgical package is performed in an HPSA, only the portion that is furnished in the HPSA should be reported with the HPSA modifier.
 - Only physician services are eligible for the HPSA incentive payment. Do not report nonphysician services with modifier AQ.
 - Modifier AQ has no effect on individual claim payment but generates a quarterly bonus payment.
 - The name, address, and ZIP code where the service was provided must be included on the electronic or paper billing to be considered for HPSA bonus payment.
- AR** Physician provider services in a physician scarcity area
- Modifier AR is appended when a physician provides services in an area designated as a physician scarcity area.
 - A health scarcity area may be urban or any other area as designated.
- AS** Physician assistant, nurse practitioner, or clinical nurse specialist services for assistant at surgery
- Medicare will pay assistant-at-surgery services directly at 85 percent of 16 percent of the amount a physician gets under the physician fee schedule (PFS). This is equal to 13.6 percent of the physician amount under the PFS.
 - See the PFS for a list of services where modifier AS can be appended.
 - Check with third-party payers for their guideline regarding modifier AS.

Determining Correct Use

Determining correct modifier assignment can be confusing at times. If the medical record documentation does not support the use of a specific modifier, the provider risks denial of the claim based on lack of medical necessity and possible fraud and/or abuse penalties if/when the medical record documentation is reviewed by federal, state, and other third-party payers.

It is important to validate the final modifier determination against the medical record documentation. First, the special circumstance that warrants the use of a modifier must be identified in the medical record. Keep in mind, a modifier provides the way a provider or facility can indicate a service provided to the patient has been changed by some distinctive situation yet the code description itself remains the same. Therefore, the medical record should contain pertinent information and an adequate definition of the service or procedure performed that supports the use of the assigned modifier. If the service is not documented or a special circumstance is not indicated, it is not appropriate to report the modifier.

HCPCS Level II modifiers may be appended to any HCPCS Level I or Level II code. Because the CPT book lists a subset of the Level II modifiers, some incorrectly assume only those modifiers may be appended to CPT codes.

For example, a pediatrician receives free flu vaccine for children under age 3 from the state health department. When the vaccine is administered, the procedure code is reported with modifier SL State supplied vaccine, appended. Although modifier SL is not listed in the CPT book, it would be incorrect to report the service without modifier SL.

Appropriate Use of Professional/Technical Component Modifiers

- Modifier 26 is appended:
 - to the procedure code to report only the professional component.
 - when a physician is providing the interpretation of the diagnostic test/study performed. The interpretation of the diagnostic test/study is a patient-specific service that is separate, distinct, written, and signed.
- Modifier TC is appended:
 - to the procedure code to report only the technical component. Payment includes both the practice and malpractice expenses.
 - to stand-alone procedure codes to describe the technical component only (e.g., staff and equipment costs) of diagnostic tests.
 - to the procedure code by portable x-ray suppliers to report only the technical component.
 - to procedures with a “1” indicator in the PC/TC field of the MPFSDB.
- Modifier TC payment rule: Payment is based solely on the technical value of each individual procedure.
 - Modifier TC is appropriate for use with the following types of services:
 - 1 = Medical care/injections
 - 2 = Surgery
 - 4 = Radiology
 - 5 = Lab
 - 6 = Radiation therapy
 - 8 = Assistant surgeon

When both the professional and technical components are performed, and the technical component was purchased by an outside entity, report the two components on separate lines on the CMS-1500 claim form.

Inappropriate Use of Professional/Technical Component Modifiers

- Appending modifier 26 for a reread of results of an interpretation initially provided by another provider.
- Appending both modifier 26, indicating that only the professional portion of the service was provided, and modifier 52 for reduced services. It is not necessary to report 52 because the professional component modifier already indicates that only a portion of the complete service was performed.
- Appending modifiers 26 and TC (except for purchased diagnostic tests) when a diagnostic test or radiology service is performed globally (both components are performed by the same provider). When a global service is

performed, the code representing the complete service should be reported without modifiers. The payment for the global service reflects the allowances for both components.

- Appending modifier TC to identify procedures that are covered only as diagnostic tests and, therefore, do not have a related professional component. The use of modifier TC on these codes is not appropriate, nor is it correct coding.

Do not append these modifiers to:

- Professional component-only procedure codes, identified in the MPFSDB by an indicator “2” in the PC/TC column.
- Global-only procedures, identified in the MPFSDB with an indicator “4” in the PC/TC column.
- Technical-component-only procedure codes, assigned an indicator “3” in the MPFSDB PC/TC column.

Appropriate Use of Other Modifiers

- Append modifier 59, XE, XP, XS, or XU when reporting a combination of codes that would normally not be reported together. This modifier indicates the ordinarily bundled code represents a service done at a different anatomic site or at a different session on the same date. This may represent a:
 - different session or patient encounter (XE)
 - different practitioner/physician (XP)
 - different site or organ system (e.g., a skin graft and an allograft in different locations) (XS)
 - separate incision/excision (XS)
 - separate lesion (e.g., a biopsy of skin on the neck is performed at the same session as an excision of a 1.0 cm benign lesion of the face) (XS)
 - separate injury (XU)
- Append modifier 59, XE, XP, XS, or XU only on the procedure designated as a separate procedural service. The physician needs to document that the procedure or service was independent of other services rendered on the same day.
- Ensure the medical record documentation is clear as to the separate and distinct procedure before appending modifier 59, XE, XP, XS, or XU to a code. This modifier allows the code to bypass edits; therefore, appropriate documentation must be present in the record.

Note: Medicare uses the Correct Coding Initiative (CCI) screens when editing claims for possible unbundling. Under CCI screens, specific codes have been identified that should not be reported together, and not all edits allow modifier 59, XE, XP, XS, or XU to override the CCI edit.
- When multiple approaches are taken to obtain a tissue sample (cytological or surgical), report the most invasive procedure performed at the same session/site in order to obtain a specimen. For example, if a fine-needle aspiration is attempted and is unsuccessful and the same physician proceeds to obtain a core biopsy using a cutting needle and ultimately finds it necessary to perform an open biopsy, all occurring at the same session, report only the open biopsy. If different lesions are biopsied using different methodologies, even at the same session, append modifier 59, XE, XP, XS, or XU. If different biopsy procedures are necessary for different reasons (e.g., fine-needle aspiration for diagnosis and needle biopsy for receptors in breast carcinoma), report both procedures.
- When a recurrent hernia requires repair (herniorrhaphy, hernioplasty), report the appropriate recurrent hernia repair code. A code for incisional hernia repair is not to be reported in addition to the recurrent hernia repair unless a medically necessary incisional hernia repair is performed at a different site. In this case, attach modifier 59 or XS to the incisional hernia repair code.
- Modifier 59 is appended only if another modifier such as XE, XS, XP, or XU does not more accurately describe the situation.
- For Medicare reporting purposes, it may be necessary to report one of the more specific X{EPSU} modifiers (XE, XS, XP, or XU) in lieu of appending the general modifier 59.

Pulp Capping (D3110–D3120).....	17	Complicated Suturing (Reconstruction Requiring Delicate Handling of Tissues and Wide Undermining for Meticulous Closure) (D7911–D7912).....	35
Pulpotomy (D3220–D3222)	17	Other Repair Procedures (D7920–D7999).....	35
Endodontic Therapy on Primary Teeth (D3230–D3240).....	17	Orthodontics (D8010–D8999).....	37
Endodontic Therapy (Including Treatment Plan, Clinical Procedures and Follow-up Care (D3310–D3333)	17	Limited Orthodontic Treatment (D8010–D8040).....	37
Endodontic Retreatment (D3346–D3348).....	17	Comprehensive Orthodontic Treatment (D8070–D8091)	37
Atexification/Recalcification (D3351–D3353)	17	Minor Treatment to Control Harmful Habits (D8210–D8220).....	37
Pulpal Regeneration (D3355–D3357)	17	Other Orthodontic Services (D8660–D8999).....	37
Apicoectomy/Periradicular Services (D3410–D3503)	17	Adjunctive General Services (D9110–D9999).....	38
Other Endodontic Procedures (D3910–D3999)	18	Unclassified Treatment (D9110–D9130).....	38
Periodontics (D4210–D4999)	19	Anesthesia (D9210–D9248)	38
Surgical Services (Including Usual Postoperative Services) (D4210–[D4278]).....	19	Professional Consultation (D9310–D9311)	38
Non-Surgical Periodontal Service (D4322–D4381)	20	Professional Visits (D9410–D9450)	38
Other Periodontal Services (D4910–D4999).....	21	Drugs (D9610–D9630).....	38
Prosthodontics, removable (D5110–D5899)	22	Miscellaneous Services (D9910–D9975).....	38
Complete Dentures (Including Routine Post-Delivery Care) (D5110–D5140)	22	Non-clinical Procedures ([D9961]–D9999).....	39
Partial Dentures (Including Routine Post-Delivery Care) (D5211–D5286)	22	Sleep Apnea Services ([D9947–D9949], [D9953–D9959])	41
		Appendix A — Resequenced CDT Codes	43

Preventive (D1110–D1999)

Dental Prophylaxis (D1110–D1120)

- D1110 prophylaxis—adult** E
Removal of plaque, calculus and stains from the tooth structures and implants in the permanent and transitional dentition. It is intended to control local irritational factors.
- D1120 prophylaxis—child** E
Removal of plaque, calculus and stains from the tooth structures and implants in the permanent and transitional dentition. It is intended to control local irritational factors.

Topical Fluoride Treatment (Office Procedure) (D1206–D1208)

Prescription strength fluoride product designed solely for use in the dental office, delivered to the dentition under the direct supervision of a dental professional. Fluoride must be applied separately from prophylaxis paste.

- D1206 topical application of fluoride varnish** E
- D1208 topical application of fluoride—excluding varnish** E

Other Preventive Services (D1301–D1355)

- D1301 immunization counseling** E
A review of a patient’s vaccine and medical history, and discussion of the vaccine benefits, risks, and consequences of not obtaining the vaccine. Counseling also includes a discussion of questions and concerns the patient, family, or caregiver may have and suggestions on where the patient can obtain the vaccine.
- D1310 nutritional counseling for control of dental disease** E
Counseling on food selection and dietary habits as a part of treatment and control of periodontal disease and caries.
- D1320 tobacco counseling for the control and prevention of oral disease** E
Tobacco prevention and cessation services reduce patient risks of developing tobacco-related oral diseases and conditions and improves prognosis for certain dental therapies.
- D1321 counseling for the control and prevention of adverse oral, behavioral, and systemic health effects associated with high-risk substance use** E
Counseling services may include patient education about adverse oral, behavioral, and systemic effects associated with high-risk substance use and administration routes. This includes ingesting, injecting, inhaling and vaping. Substances used in a high-risk manner may include but are not limited to alcohol, opioids, nicotine, cannabis, methamphetamine and other pharmaceuticals or chemicals.
- ▲ D1330 oral hygiene instructions** E
- D1351 sealant—per tooth** E
Mechanically and/or chemically prepared enamel surface sealed to prevent decay.
- # D1353 sealant repair—per tooth** E
- D1352 preventive resin restoration in a moderate to high caries risk patient—permanent tooth** E
Conservative restoration of an active cavitated lesion in a pit or fissure that does not extend into dentin; includes placement of a sealant in any radiating non-carious fissures or pits.
- D1353 Resequenced code. See code following D1351.**
- D1354 application of caries arresting medicament – per tooth** E
Conservative treatment of an active, non-symptomatic carious lesion by topical application of a caries arresting or inhibiting medicament and without mechanical removal of sound tooth structure.

- D1355 caries preventive medicament application—per tooth** E
For primary prevention or remineralization. Medicaments applied do not include topical fluorides.

Space Maintenance (Passive Appliances) (D1510–D1558)

Passive appliances are designed to prevent tooth movement.

- D1510 space maintainer—fixed, unilateral—per quadrant** S
Excludes a distal shoe space maintainer.
- D1516 space maintainer—fixed—bilateral, maxillary** S
- D1517 space maintainer—fixed—bilateral, mandibular** S
- D1520 space maintainer—removable, unilateral—per quadrant** S
- D1526 space maintainer—removable—bilateral, maxillary** S
- D1527 space maintainer—removable—bilateral, mandibular** S
- D1551 re-cement or re-bond bilateral space maintainer—maxillary** S
- D1552 re-cement or re-bond bilateral space maintainer—mandibular** S
- D1553 re-cement or re-bond unilateral space maintainer—per quadrant** S
- D1556 removal of fixed unilateral space maintainer—per quadrant** E
- D1557 removal of fixed bilateral space maintainer—maxillary** E
- D1558 removal of fixed bilateral space maintainer—mandibular** E

Space Maintainers (D1575)

- D1575 distal shoe space maintainer—fixed, unilateral—per quadrant** S
Fabrication and delivery of fixed appliance extending subgingivally and distally to guide the eruption of the first permanent molar. Does not include ongoing follow-up or adjustments, or replacement appliances, once the tooth has erupted.

Vaccinations (D1701–D1999)

- D1701 Pfizer-BioNTech Covid-19 vaccine administration—first dose** E
SARSCOV2 COVID-19 VAC mRNA 30mcg/0.3mL IM DOSE 1
- D1702 Pfizer-BioNTech Covid-19 vaccine administration—second dose** E
SARSCOV2 COVID-19 VAC mRNA 30mcg/0.3mL IM DOSE 2
- D1703 Moderna Covid-19 vaccine administration—first dose** E
SARSCOV2 COVID-19 VAC mRNA 100mcg/0.5mL IM DOSE 1
- D1704 Moderna Covid-19 vaccine administration—second dose** E
SARSCOV2 COVID-19 VAC mRNA 100mcg/0.5mL IM DOSE 2
- D1705 AstraZeneca Covid-19 vaccine administration—first dose** E
SARSCOV2 COVID-19 VAC rS-ChAdOx1 5x1010 VP/.5mL IM DOSE 1
- D1706 AstraZeneca Covid-19 vaccine administration—second dose** E
SARSCOV2 COVID-19 VAC rS-ChAdOx1 5x1010 VP/.5mL IM DOSE 2
- D1707 Janssen Covid-19 vaccine administration** E
SARSCOV2 COVID-19 VAC Ad26 5x1010 VP/.5mL IM SINGLE DOSE
- D1708 Pfizer-BioNTech Covid-19 vaccine administration-third dose** E
SARSCOV2 COVID-19 VAC mRNA 30mcg/0.3mL IM DOSE 3
